Title: Customer expectations, perceptions and satisfaction ... measurement methodologies

Author: Walsh, Joanne M.

Corporate Source: AT&T Bell Lab, Holmdel, NJ, USA

Conference Title: Proceedings of the 37th Annual Meeting the Human Factors and Ergonomics Society

Conference Location: Seattle, WA, USA Conference Date: 19931011-19931015

E.I. Conference No.: 19548

Source: Designing for Diversity Proceedings of the Human Factors and Ergonomics Society v 1 1993. Publ by Human Factors and Ergonomics Society, Inc., Santa Monica, CA, USA. p 432-434

Publication Year: 1993

CODEN: PHFSDQ ISSN: 0163-5182

Language: English

Abstract: This paper describes two interconnected methodologies for soliciting *customers*' expectations of suppliers (of *products* or services) and for measuring satisfaction against these expectations. The first of these procedures *identifies* *Key* *Purchase*/Evaluative Criteria and takes the form of a structured interview. It pursues the *customers* unaided spontaneous identification of the critical and essential attributes necessary to meet (or exceed) their expectations. The focus is on individual *customers*' operational definitions of these attributes and their view of importance. The second, Report Card methodology...

...this Report Card can be described as analogous to a Chinese menu with specific core *items* accompanied by key attributes and other customized *items* from which to choose. Both methodologies rate suppliers and the suppliers' competitors identified as such...

...the ratings of suppliers and against the maximum possible score. Results are presented in the *customers*' words and include a 'How to Think About This' interpretation that shapes recommendations. (Author abstract)
